

BABY STEAM BOILER

It fulfills pollution control norms by reducing the possibility or any risk of any injury due to thermal shock.

DESCRIPTION :

- Made up of stainless steel
- Its capacity is 12 ton per day
- Working capacity is 22-23 hrs/day.

FH FABHIND[®]

BENEFITS :

- Improves the safety factor by injecting the pressurized steam (100°C) in the reactor
 - Helps in increasing efficiency, by reducing cooling time.
 - With the help of baby steam boiler, process time of 12 TPD (tons per day) completes within 23.5 hr, and 10 TPD process completes within 22 hr.
 - Also helps in cooling down of carbon black.
 - Assurance of 23 - 25 batches for 12 TPD and 10 TPD.
-
